

Smart Motion Sensor

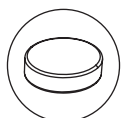

Quick Installation Guide

Mounting Bracket with Double-sided Tape

Spare Double-sided Tape Piece

CR2450 Battery

1

## Download the App

Search for **mydlink** and download the app.

**Note:** This product is incompatible with other mydlink apps such as 'mydlink Home,' 'mydlink Lite,' etc.

2

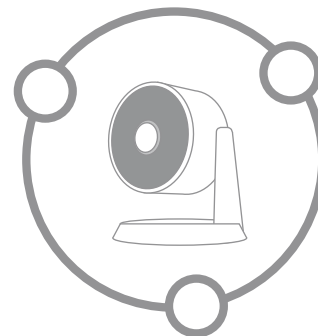

## Log In

**Sign In** or **Sign Up** for a mydlink account. mydlink Lite users may sign in with the same account.

3

## Set Up Your Hub

Follow the instructions provided for your hub and ensure it is set up and functioning properly. Set up your device with your Smart Hub nearby.

For more information on mydlink Smart DIY visit: [dlink.com.au/SmartDIY](http://dlink.com.au/SmartDIY)

4

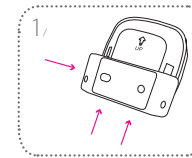

## Add the Device

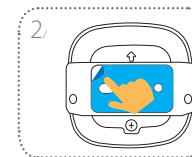

Tap the menu button then tap **Add a Device**. Scan the Setup Code on the back of the device, then follow the app instructions.

5

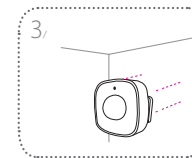

## Mounting

Align the back of the sensor with the tabs on the sides of the mounting bracket. Slide the mounting bracket up to lock it into place.

Peel the sticker off the back of the double-sided tape on the back of the mounting bracket.

Press the sensor firmly on the surface you wish to mount it on, ensuring it stays attached. Position the sensor so that the grey dot marker is at the top.

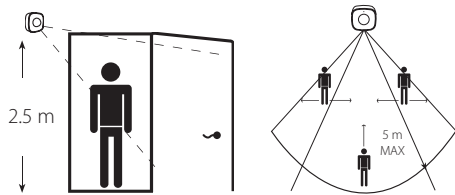

## Precautions

### Caution:

-   Make sure that the sensor is not directly facing the sun or a source of heat.

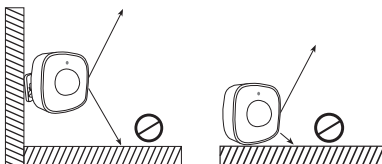

### Proper Placement:

Place the sensor at least 2.5 m or higher from the ground. The maximum distance of the motion detection is 5 m.

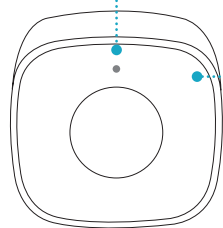

### Improper Placement:

Do not place the sensor directly on top of a surface or in a spot where there is something directly below it, obstructing its view.

## FAQ

### What do I do if my device is not working properly?

Reset the device and reinstall it. To reset your device, press and hold the **Reset** button until the LED blinks red.

During installation, ensure that:

- you have an Internet connection on your router
- your router's Wi-Fi is on
- your mobile device is connected to your home network
- your mydlink Smart DIY hub\* is connected to the Internet

### Why does my sensor not trigger anything?

Avoid placing your sensor where it directly faces a source of heat or light as this can obscure the sensor's ability to pick up motion. Glass, plastic, or similar materials standing between the target and the sensor may not allow it to be triggered. The maximum detection distance is approximately **5 meters**.

### How do I replace the battery?

Remove the mounting bracket. Use a screwdriver to unscrew the battery cover. Pull the small notch to release the battery.

\* Requires a mydlink Smart DIY hub device.
