Chapter 1 Introduction

1.1 Introduction

Congratulations on your purchase of D-Link DWM-314-TP 4G Multi-Connect PoE Modem. With this D-Link 4G Multi-Connect PoE Modem you have made a great first step in the world of connected Internet of things (IoT) by simply inserting a SIM card from the local mobile carrier into this device to get things connected. This section gives you all the information you need to set up your device.

Main Features:

- Provide 3G/4G WAN connection
- Provide four Fast Ethernet ports for the LAN connection (2 ports with 802.3at PSE function)
- Instinctive Web GUI is used for basic setting and check the cellular status.
- Designed easy-to-mount metal body for business and M2M environment to work with a variety of M2M (Machine-to-Machine) applications.

Before you install and use this product, please read this manual in detail for fully exploiting the functions of this product.

4G Multi-Connect PoE Modem

1.2 Contents List

1.2.1 Package Contents

#Standard Package

Items	Description	Contents	Quantity
1	DWM-314-TP 4G Multi-Connect PoE Modem		1pc
2	Cellular Antenna		2pcs
3	RJ45 Cable		1pc
4	2 Pin Terminal Block		1pc
5	Power Adapter (54V/1.67A)		1pc
6	Power cord		1pc
7	DIN-Rail Bracket		1 set (DIN rail: screw x3)

4G Multi-Connect PoE Modem

1.3 Hardware Configuration

➤ FrontView

※Reset Button

RESET button provides user a quick and easy way to resort the default setting. Press the RESET button continuously for more than 8 seconds when the 3G/LTE LED (blue and Flash) flashes alternately for 3~4 seconds, and then release it. The device will restore to factory default settings.

4G Multi-Connect PoE Modem

➤ RightView

➤ Left View

※System Port (Micro USB)

The System port on the DWM-314-TP is exclusively reserved for RD internal debugging. Connecting a Micro USB cable to this port will not activate any functions or provide access to the device's system.

4G Multi-Connect PoE Modem

1.4 LED Indication

Indication	LEDColor	Description
 Power	Blue	Steady On: Device power is on Off: Device power is off
 Cellular	Blue	Blue and Steady On: Cellular is registering to network. Blue and Flash: Cellular is not registered to network.
 Signal Strength	Blue	Blue and Steady On: Cellular signal is good. Blue and Slow Flash: Cellular signal is weak. OFF: No cellular signal.
PoE1   PoE2 PoE 1 ~ 2	Blue	Steady On: Supply PoE Power to Ethernet Port. Off: No PoE Power to Ethernet Port.
LAN1~4 (in RJ45 port)	Green	Green and Steady On: An Ethernet device is connected. Green and Flash: Data transmission through Ethernet.

4G Multi-Connect PoE Modem

1.5 Installation& Maintenance Notice

1.5.1 System Requirements

Network Requirements	• AnEthernet RJ45cable • 4G cellular service subscription • Ethernet adapter on PC
Web-based Configuration Utility Requirements	Computer with the following: • Windows®, Macintosh, or Linux-based operating system • An installed Ethernet adapter Browser Requirements: • Microsoft Edge 119 or higher • Chrome 73 or higher • Firefox 60.0 or higher

1.5.2 Warning

Attention

- DC 54V/1.67A power adapters are recommended.
- Do not open or repair the case yourself. If the product is too hot, turn off the power immediately and have it repaired at a qualified service center.
- Place the product on a stable surface and avoid using this product and accessories outdoors.

4G Multi-Connect PoE Modem

Federal Communication Commission Interference Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

FOR PORTABLE DEVICE USAGE (<20m from body/SAR needed)

Radiation Exposure Statement:

The product complies with the FCC portable RF exposure limit set forth for an uncontrolled environment and are safe for intended operation as described in this manual. The further RF exposure reduction can be achieved if the product can be kept as far as possible from the user body or set the device to lower output power if such function is available.

FOR MOBILE DEVICE USAGE (>20cm/low power)

Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

FOR COUNTRY CODE SELECTION USAGE (WLAN DEVICES)

Note: The country code selection is for non-US model only and is not available to all US model. Per FCC regulation, all WiFi product marketed in US must be fixed to US operation channels only.

4G Multi-Connect PoE Modem

1.5.3 Hot Surface Caution

CAUTION: The surface temperature for the metallic enclosure can be very high! Especially after operating for a long time, installed at a closed cabinet without air conditioning support, or in a high ambient temperature space.

DO NOT touch the hot surface while servicing!!

4G Multi-Connect PoE Modem

1.5.4 Product Information for CE RED Requirements

The following product information is required to be presented in product User Manual for latest CE RED requirements.¹

(1) Frequency Band & Maximum Power

1.a Frequency Band for Cellular Connection (for EC25-EU version)

Band number	Operating Frequency	Max output power
LTE FDD BAND 1	Uplink:1920-1980 MHz Downlink:2110-2170 MHz	23.1dBm
LTE FDD BAND 3	Uplink:1710-1785 MHz Downlink:1805-1880 MHz	23.0dBm
LTE FDD BAND 7	Uplink:2500-2570 MHz Downlink:2620-2690 MHz	22.8dBm
LTE FDD BAND 8	Uplink:880-915 MHz Downlink:925-960 MHz	23.2dBm
LTE FDD BAND 20	Uplink:832-862 MHz Downlink:791-821 MHz	23.5dBm
LTE FDD BAND 28A	Uplink: 704 -723 MHz Downlink: 759 -778MHz	23dBm
LTE FDD BAND 38	Uplink: 2570-2620 MHz Downlink: 2570-2620 MHz	21.7dBm
LTE FDD BAND 40	Uplink: 2300-2400 MHz Downlink: 2300-2400 MHz	21.5dBm
WCDMA BAND 1	Uplink:1920-1980 MHz Downlink:2110-2170 MHz	23.3dBm
WCDMA BAND 8	Uplink:880-915 MHz Downlink:925-960 MHz	
E-GSM	Uplink:880-915 MHz Downlink:925-960 MHz	32.9 dBm
DCS	Uplink:1710-1785 MHz Downlink:1805-1880 MHz	29.9 dBm

¹ The information presented in this section is ONLY valid for the EU/EFTA regional version. For those non-CE/EFTA versions, please refer to the corresponding product specification.

4G Multi-Connect PoE Modem

1.6 Hardware Installation

This chapter describes how to install and configure the hardware

1.6.1 Mount the Unit

The DWM-314 series can be placed on a desktop, or use extender to place on DIN-Rail bracket or mount on the wall.

1.6.2 Insert the SIM Card

WARNING: BEFORE INSERTING OR CHANGING THE SIM CARD, PLEASE MAKE SURE THAT POWER OF THE DEVICE IS SWITCHED OFF.

SIM card slot is located in the right side of DWM-314 series. You need to unscrew and remove the outer SIM card cover before installing or removing an inserted SIM card. Please follow below instructions to install or remove SIM card. After SIM card is well installed or removed, screw back the outer SIM card cover.

Step 1:

Loosen the screws as below and remove the SIM cover.

Step 2:

Push the SIM card into the SIM slot.

Step 3:

Push the inserted SIM card again to reject it from the SIM slot.

4G Multi-Connect PoE Modem

1.6.3 Connecting to the Network or a Host

The DWM-314 series provides four RJ45 ports to connect to 10/100Mbps Ethernet. It can auto detect the transmission speed on the network and configure itself automatically. Connect the Ethernet cable to the RJ45 port (LAN) of the device and plug another end of the Ethernet cable into your computer's network port to connect this device to the host PC for device configuration.

1.6.4 Setup by Configuring WEB UI

You can browse web UI to configure the device.

Type in the IP Address (<http://192.168.0.1>)²

When you see the login page, enter the user name and password and then click '**Login**' button.

A screenshot of a web-based login interface for a router. The page has a dark grey header with the word 'Login' in white. Below the header, the text 'Welcome to the router configuration interface. Enter the password and click 'Login'' is displayed. There are two input fields: one labeled 'Username' and another labeled 'Password'. Both fields are empty. At the bottom center of the form is a dark grey button with the word 'Login' in white.

The default setting for both username and password is '**admin**'³.

2. The default LAN IP address of this gateway is 192.168.0.1 , If you change it, you need to login by using the new IP address.

3. For security concern, the login process will force user to change default password at the first time.

Cellular Access Item	Value setting	Description
Network Type	1. A must-fill setting 2. By default Auto is selected	3G/LTE
APN	1. A must-fill setting 2. By default Auto is selected	Auto The unit will detect the SIM and set an APN from internal database. Manual User must set APN manually.
Manual APN	1. A must-fill setting 2. String format : any text	Enter the APN you want to use to establish the connection. This is a must-fill setting if you selected Manual APN as APN scheme.
Username	1. An optional setting 2. String format : any text	Enter the optional Username settings if your ISP provided such settings to you.
Password	1. An optional setting 2. String format : any text	Enter the optional Password settings if your ISP provided such settings to you.
Authentication	1. A Must-fill setting 2. By default Auto is	Select PAP (Password Authentication Protocol) and use such protocol to be authenticated with the carrier's server.

4G Multi-Connect PoE Modem

	selected	Select CHAP (Challenge Handshake Authentication Protocol) and use such protocol to be authenticated with the carrier's server. When Auto is selected, it means it will authenticate with the server either PAP or CHAP .
IP Type	1. A must-fill setting 2. By default IPv4 is selected	Specify the IP type of the network service provided by your 3G/4G network. It can be IPv4 , IPv6 , or IPv4v6 .
IP Mode	1. A must-fill setting 2. By default Dynamic IP is selected	Dynamic IP The unit will get IP from cellular service.. Static IP The unit will set IP according to Static IP Config .
PIN Code	1. An optional setting 2. String format : interger	If the PIN (Personal Identification Number) code is required to unlock your SIM card, enter the PIN code you set.
Roaming	1. An optional setting 2. Uncheck by default	Check the checkbox to enable the modem to connect on the cellular network at roaming state.
MTU Setup	1. An optional setting 2. Uncheck by default	Check the Enable box to enable the MTU (Maximum Transmission Unit) limit, and specify the MTU for the 3G/4G connection. MTU refers to Maximum Transmission Unit. It specifies the largest packet size permitted for Internet transmission. Value Range: 68 ~ 1500.
Keep Alive	1. An optional setting 2. Box is unchecked by default	Check the Enable box to activate the keep-alive function. Input IP Address and interval to send an ICMP packet to check the network status.
Discard Ping from WAN	1. An optional setting 2. Uncheck by default	The modem will not respond the ICMP request packet from remote hosts when the checkbox is checked.

3.1.3 Port Forwarding

"Virtual Server" allows you to access servers with the global IP address of the gateway as if they are servers existed in the Internet. The gateway serves the service requests by port forwarding the requests to the LAN servers and transfers the replies from LAN servers to the requester on the WAN side.

Item	Value setting	Description
Port-1	The box is unchecked by default	Check the Enable box to activate PoE function.
PD Ping Check	The box is unchecked (Disable) by default	Check the Enable box to activate PD Ping Check function. In addition to enable the function, you have to specify a timeout value for timeout check. Value Range: 10 ~ 300 seconds.
PD No-response Action	No Action by default	Specify the the action to take when the PD doesn't reply the Ping check activity. (PD No-response).It could be No Action or Power off/on . Select Power off/on to restart the PD device, if required.
Time schedule	(0)Always is set by default	if you have set other schedule rules, there will be other options to select.
Enable	The box is unchecked by default	Check the Enable box to activate PoE function.

3.2 Routing

Routing Item	Value setting	Description
Static Routing	The box is unchecked by default	Check the Enable box to activate this function.
Routing Information	N/A	The routing information allows user to view the routing table and policy routing information.

3.2.1 Static Routing

"Static Routing" function lets you define the routing paths for some dedicated hosts/servers or subnets to store in the routing table of the gateway. The gateway routes packets to different peer gateways based on the routing table. You need to define the static routing information in gateway routing rule list.

Static Routing Item	Value setting	Description
Static Routing	The box is unchecked by default	Check the Enable box to activate this function. Click Add will pop-up Static Routing Rule Configuration page.
