Environmental Protection

This product has been designed to comply with the requirements on environmental protection. For the proper storage, use and disposal of this product, national laws and regulations must be observed.

Safety and Compliance Information

Safety Symbols

The symbols in the following table may be found on installation-related equipment. Be aware of the situations indicated and take necessary safety precautions during equipment installation and maintenance.

Symbol	Description
	Generic alarm symbol: To suggest a general safety concern.
	ESD protection symbol: To suggest

Symbol	Description
	electrostatic-sensitive equipment.
	Electric shock symbol: To suggest a danger of high voltage.

The symbols in the following table may be found in this manual. Carefully follow the instructions indicated by the symbols to avoid hazardous situations and use the product properly.

Symbol	Description
 WARNING!	Indicates a hazardous situation which, if not avoided, could result in bodily injury or death.
 CAUTION!	Indicates a situation which, if not avoided, could result in damage, data loss or malfunction to product.
 NOTE!	Indicates useful or supplemental information about the use of product.

Safety Information

Installation and removal of the unit and its accessories must be carried out by qualified personnel. Please read all of the safety instructions below before installation and operation.

- This device is a class A product and may cause radio interference. Take measures if necessary.
- While shipping, the device should be packed in its original packing.
- Verify that installation is correct. Incorrect cable connection may cause personal injury or device damage.
- The installation must be made by qualified personnel and should conform to all the local codes.
- If the product does not work properly, please contact your dealer. Never attempt to disassemble the device yourself. We shall not

assume any responsibility for problems caused by unauthorized repair or maintenance.

- Ensure a proper operating environment, including temperature, humidity, ventilation and power supply. Make sure the device is properly grounded and the lightning protection meets requirements. Keep the device from moisture, dust, strong electromagnetic radiation and vibration.
 - Power down the device before connecting and disconnecting accessories and peripherals.
 - Protect the power cable from being stepped on or pressed, particularly at the plug, receptacle, and the part leading out of the device.
 - Strictly follow the procedure to shut down the device. Sudden power failures can cause disk damage and functional abnormalities. In an environment where power supply is frequently interrupted, use an Uninterrupted Power Supply (UPS).
 - Take necessary measures to ensure data security and protect the device from network attack and hacking (when connected to Internet). Possible risks and consequences are at user's sole discretion.
-

**WARNING!**

- Never look at the transmit laser while the power is on. Never look directly at the fiber ports and the fiber cable ends when they are powered on.
 - Use of controls or adjustments to the performance or procedures other than those specified herein may result in hazardous laser emissions.
-

Regulatory Compliance

FCC statements

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Caution: The user is cautioned that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

LVD/EMC Directive

This product complies with the European Low Voltage Directive 2014/35/EU and EMC Directive 2014/30/EU.

WEEE Directive-2012/19/EU

The product this manual refers to is covered by the Waste Electrical & Electronic Equipment (WEEE) Directive and must be disposed of in a responsible manner.

Battery Directive-2013/56/EC

Battery in the product complies with the European Battery Directive 2013/56/EC. For proper recycling, return the battery to your supplier or to a designated collection point.

10	SWITCH		<ul style="list-style-type: none"> Press once: confirm. Press twice: snapshot when controlling PTZ camera or recording video.

Joystick Function

Table 1-2 Joystick Functions

Operation	Description
Up	<ul style="list-style-type: none"> Navigate between menu items. Tilt up in PTZ control mode. Play fast or select the previous menu in NVR control mode.
Down	<ul style="list-style-type: none"> Navigate between menu items. Tilt down in PTZ control mode. Play slow or select the next menu in NVR control mode.
Left	<ul style="list-style-type: none"> Navigate between menu items. Turn left in PTZ control mode.

Operation	Description
Right	<ul style="list-style-type: none">• Navigate between menu items.• Turn right in PTZ control mode.
Upper left/lower left/upper right/lower right	Control directions in PTZ control mode.
Rotate counterclockwise	Zoom out in PTZ control mode.
Rotate clockwise	Zoom in in PTZ control mode.

**NOTE!**

In PTZ control mode, the further you tilt the joystick, the faster the camera rotates. The joystick allows the maximum rotation degree of $\pm 45^\circ$. Use the joystick carefully to avoid damage.

Keyboard Interfaces

Network keyboard

Serial-interface keyboard

2 Cable Connection

Connect RS485 Connector

Connect an NVR through the RS485 connector.

Connect A of the RS485 connector to RS485+ of NVR, and connect B to RS485- of NVR, as shown below.

NOTE!

Only 2A and 2B of the RS485 connector can be used to connect keyboards in parallel.

3 Startup and Shutdown

Startup

1. Connect power. The power LED is lit. When the system time displays on the screen, press ENTER.

2. Use the joystick (tilt left/right/up/down) to navigate and input the correct username and password.

**NOTE!**

- The default admin username/password is admin/123456. The default operator username/password is user/123456.
- Press SHIFT to switch inputs between numeric, uppercase letters, and lowercase letters.
- When locked, the system time displays on the screen. To display the main menu, press ENTER and input the username and password.

3. Press ENTER to display the main menu.

Shutdown

Exit the system and then unplug power to shut down the keyboard.

4 Setup

Access the main menu first. See Startup for detailed steps.

Set the Network

1. Tilt the joystick up/down to navigate. Press ENTER to select. Press ESC to exit.

Path: Main Menu>Local Cfg>Net Cfg

2. Use the joystick to locate the cursor. Press number keys to input the IP, subnet mask, and gateway.

NOTE!

Default IP address: 192.168.1.16.

Add NVR Devices

Only admin can add devices.

Preparation

- Log in to the NVR and note down its device ID (to be used in Step 2).
- Make sure the NVR to add is connected.

Steps

1. Tilt the joystick up/down to navigate. Press ENTER to select.

Path: Main Menu>Dev Manage>Manual Cfg>Add Dev

2. Set the device ID, name, type and connection method, and press ENTER.

3. Input NVR's IP.

NOTE!

The device ID must be set correctly. See Basic Concept for details.

- If the keyboard is connected to the NVR through an RS232 or RS485 interface, press ENTER and then complete settings. The protocol, baud rate, data bit, check bit, and stop bit should be the same as settings in the NVR.

- If the keyboard is connected to the NVR through network, press ENTER and then input the NVR's IP address.

Manage Users

1. Tilt the joystick up/down to navigate. Press ENTER to select.
Path: Main Menu>Advance Cfg>User Manage
2. Add and delete users as needed or change user password.

5 Common Operations

Access the main menu first. See Startup for detailed steps.

Basic Concept

ID refers to device ID.

If the NVR is connected through the RS485 serial interface, you need to input the NVR's actual ID (you can find out by logging in to the NVR) and set the serial interface in the NVR as follows: serial interface mode to keyboard, protocol the same as on the keyboard, baud rate to 9600, data bit to 8, stop bit to 1, and check bit to none.

If the NVR is connected through network, the preceding requirement on ID is unnecessary because device IDs are only used for searching.

Control a PTZ Camera

Use the joystick or PTZ control keys to operate a PTZ camera connected via an NVR.

Option 1

1. Press ID.

ID:133

2. Input the NVR's device ID and then press ENTER. The basic device information is displayed.

ID:133
Name:133
D_Type:NVR
L_Type:NetWork

3. Press ENTER to confirm.
4. Press a number key and then press MON to specify the monitor.

I D:133
MON: WIN:
CAM:
PNL:Right

5. Press a number key and then press WIN to specify the preview window linked to the PTZ camera.

**NOTE!**

- You need to log into the NVR first; otherwise PTZ control is unavailable.
- PTZ control is unavailable if the specified window links to more than one camera.

6. Press PTZ to activate PTZ control mode.
 - Use the PTZ control keys to adjust zoom and focus.
 - Use the joystick to control the rotation direction and speed (speed depends on the degree of rotation). Twist the joystick to zoom in and out.
7. Press ESC to exit PTZ control mode.

Option 2

You need to log in to the NVR and note down the camera's device ID (to be used in Step 4).

1. Press ID.
2. Input the NVR's device ID and then press ENTER. The basic device information is displayed.
3. Press ENTER to confirm.
4. Press a number key and then press CAM to specify the PTZ camera.
5. Press PTZ to activate PTZ control mode.
 - Use the PTZ control keys to adjust zoom and focus.
 - Use the joystick to control the rotation direction and speed (speed depends on the degree of rotation). Twist the joystick to zoom in and out.
6. Press ESC to exit PTZ control mode.

Play Live Video

Play live video on the monitor's screen in the current screen layout (e.g., 4 windows).

1. Press ID.

2. Input the NVR's device ID and then press ENTER. The basic device information of is displayed.
3. Press ENTER to confirm.
4. Press a number key and then press MON to specify the monitor.
5. Press a number key and then press WIN to specify the preview window.
6. Press a number key and then press CAM to specify the camera.
7. Press ENTER.

Playback

1. Press ID.
2. Input the NVR's device ID and then press ENTER. The basic device information of is displayed.
3. Press ENTER to confirm.
4. Press R_CLICK to show the shortcut menu and push down the joystick to choose playback, then click the joystick to display playback screen
5. Use the joystick to select the camera and the playback time, then click the joystick to start playback.

Control Menus

1. Press ID.
 2. Input the device ID and then press ENTER.
- R_CLICK: Show the shortcut menu that appears with a right-click of the mouse in a preview window.
 - MENU: Display the main menu.
 - ESC: Return to the previous window.
 - MUTE: Turn off audio
 - TOOLBAR: Show the toolbar
 - F1: Switch active area such as text box, drop-down list on a tab.

- F2: Switch tab on screen

Multi-Window View

Change the preview layout (number of on-screen windows) on NVR.

1. Press ID.
2. Input the NVR's device ID and then press ENTER.
3. Press MULT till the desired multi-window view appears, or press a number key and then press MULT.

Set Preset

The ID of preset ranges from 0 to 255.

1. Press ID.
2. Input the NVR's device ID and then press ENTER. The basic device information is displayed.
3. Press ENTER to confirm.
4. Press a number key and then press CAM to specify the PTZ camera.
5. Press PTZ to activate PTZ control mode.
6. Press SET to change PTZ mode

7. press the ID of preset, then use the joystick to place PTZ, and press PRESET in the end
8. repeat the 7th step to set the next preset.

Invoke Preset

The premise of Invoke preset is you have set preset.

1. Press ID.
2. Input the NVR's device ID and then press ENTER. The basic device information is displayed.
3. Press ENTER to confirm.
4. Press a number key and then press CAM to specify the PTZ camera.
5. Press PTZ to activate PTZ control mode.
6. Press the ID of preset that you want and press preset to invoke the preset.

Invoke Preset Patrol

The premise of starting preset patrol is you have set preset patrol.

1. Press ID.
2. Input the NVR's device ID and then press ENTER. The basic device information is displayed.
3. Press ENTER to confirm.
4. Press a number key and then press CAM to specify the PTZ camera.
5. Press PTZ to activate PTZ control mode.
6. Press the ID of preset patrol that you want and press patrol to invoke the preset patrol.

ID:133
MON: WIN:
CAM:
PTZ:Patrol

7. Press the number + patrol to stop the preset patrol.

Invoke Recorded Patrol

The premise of starting recorded patrol is you have set recorded patrol.

1. Press ID.
2. Input the NVR's device ID and then press ENTER. The basic device information is displayed.
3. Press ENTER to confirm.
4. Press a number key and then press CAM to specify the PTZ camera.
5. Press PTZ to activate PTZ control mode.
6. Press number 1 and press route to invoke the recorded patrol

ID:133
MON: WIN:
CAM:
PTZ:Route

7. Press the number 1 + route to stop the recorded patrol.

**NOTE!**

- NVR patrol requires the latest NVR firmware.

Sequence

The number of window is less than the number of IPC(for example,you want 4 multi-window and have 9 IPC.)

1. Press ID.
2. Input the NVR's device ID and then press ENTER. The basic device information is displayed.
3. Press ENTER to confirm.
4. Press 4 and MULT to display 4 window on the screen.
5. Press RUN to start Sequence
6. Press RUN to stop Sequence.
